Building Blocks for Engineers of the Future

Visit the Portal

The Portal provides a totally immersive educational experience using video technology to “teleport” students to another portal around the country or across the globe. It becomes a collaborative classroom with real people in real time and offers students the opportunity to gain an understanding of one another that can only come through shared spaces.

This event is free and open to the public.

Students in all grades welcome.

For more information, visit www.aceandover.org.
